WAI

A Tehsil That Reads. A Tehsil That Plays.

The ecosystem is built with the participation of all stakeholders - students, teachers, parents, Gram Panchayats, villagers, and community institutions. With the support of Non-Resident Villagers (NRVs):

- 553 G**y**an-**k**ey Libraries: *For reading, mental development and peace*
- 256 Fit-**k**e**y** Basketball Kits: *For physical well-being, focus and goal*
- 9,400 books delivered directly to households
- The initiative covers all Gram Panchayats and schools, along with ST bus stands, select offices, Youth Clubs, hotels and other community spaces.

One tehsil. One ecosystem. 7 to 87.

THE ENTIRE ECOSYSTEM

From ages 7 to 87, with a special thrust on 7 to 13

A scientific & professional approach

- The Wai model was designed to **make reading** and **physical activity visible** and **accessible** throughout the community.
- The learning journey **grows organically from 3rd to 8th standard**, with age-appropriate book sets for each class rather than giving every child the same content.
- Our strongest intervention is for students aged 7–13, when habits inculcated and their grasp is at its peak.

AI is welcomed by everyone,
along with that,
reading, playing & human touch is equally important

805+ INSTALLATIONS

The difference is execution:

This was not a programme where material was simply dispatched to Wai.

Our team personally installed G**y**an-**k**ey & Fit-**k**e**y** across 805+ locations:

Schools | Gram Panchayats | ST stands | Youth Clubs | Community spaces | Offices | Hotels

Installation is only the beginning

Install → Documentation → Follow-up → Feedback → Nurturning → Revisit → Other activities

The objective is not to count how many units were installed.

The objective is to keep them being used.

Wai tehsil is the proof of concept

Phase I : Minimum 1 tehsil in each region

Phase II : Minimum 1 tehsil in each district

Phase III - All 355 tehsils

With the support of Non-Resident Villagers (NRV) and villagers, we will **ALL** achieve it
